

MSK Fellowship

2014 Advanced Training Position Musculoskeletal Imaging

Albury, NSW

The MSK Fellowship at Regional Imaging's Border Campus in Albury, NSW is a fully accredited RANZCR Advanced Training Position. The comprehensive practice performs over 10,000 MSK examinations annually with a mixture of MRI, CT, US and fluoroscopy.

The Fellowship focuses on musculoskeletal MRI including knee, shoulder, hip, wrist, elbow and foot/ankle. Imaging-guided interventional procedures include MR arthrograms, US guided therapeutic injections (joints, bursae, ganglia, tendons/sheaths, ligaments, carpal tunnel), and a range of spinal procedures (facet joint injections, nerve root blocks, discography, vertebroplasty).

Regional Imaging is Australia's leading provider of medical imaging services to Regional Australia. We operate as a group of independently managed, comprehensive radiology practices servicing the major population centres of southern New South Wales, north and eastern Victoria, Tasmania and the Northern Territory. Regional Imaging is a member of the I-MED Radiology Network and the MSK Fellow will have access to the extensive resources and expertise across the Network.

The position is based in Albury on the NSW/VIC border with a large regional population of over 100,000 people. There is convenient, easy access to Melbourne and Sydney. The region is renowned for food and wine, skiing, cycling, tennis, golf and water sports on the Murray River. The staff are relaxed and friendly with a commitment to quality and high academic standard.

Key Features:

- Option for hybrid MSK Fellowship / Consultant contract for 1st year FRANZCR
- Flexibility for 6 or 12 month appointment
- Attractive salary package plus relocation assistance for the candidate and local support for the partner
- 3T MRI with state-of-the-art coil technology (one of the first Australian sites using an 8 channel shoulder coil), 64 and 160 slice MSCT with CT fluoroscopy, digital radiography, ultrasound, nuclear medicine
- Full supervision in Private Hospital based practice with supportive team of experienced radiologists
- Weekly orthopedic surgical meetings
- Access to a full range of up-to-date books, journals and teaching library
